Key: Notification Procedures – Clarification for Councillors and Members of the Public

Full Planning Applications (FUL): These applications require formal consultation with the parish council and are routinely circulated to councillors.

Householder Applications (HOUS): Applications for extensions or alterations to domestic properties are typically notified to parish councils.

Discharge of Conditions (DSC): These relate to the approval of conditions attached to existing permissions. They are processed administratively and do not trigger mandatory parish council consultation.

Certificates of Lawful Use/Development (CLPUD): Applications confirming existing lawful use or development status are also administrative and do not require notification.

EIA Screening / Scoping (EIA): These are preliminary assessments to determine whether an Environmental Impact Assessment is required and do not automatically trigger parish council consultation.

This procedural distinction explains why some applications may not have been circulated to councillors. All applications remain publicly accessible via the Cheshire East Planning Portal.
